

SINCE 2014 / MANAGED SECURITY, HUMANS BEHIND THE ALERTS

Find the gaps before attackers do.

Enterprise-grade cybersecurity for businesses that cannot afford surprises: vulnerability assessment, penetration testing, and around-the-clock monitoring, backed by a security operations center staffed with real analysts.

24/7

Monitoring

Threat detection and response, always on

SOC

Real analysts

Every alert reviewed by a person, not a script

Free

First look

Every engagement starts with a no-cost assessment

HOW WE WORK

- We find the gaps
- We watch the perimeter
- We answer the alerts

01

Assess

FIND IT FIRST

Know what is exposed before an attacker does.

- Vulnerability assessment across your environment
- Penetration testing that thinks like an attacker
- Clear findings, ranked by what to fix first
- Starts with a free consultation, no pressure

02

Monitor

ALWAYS ON

A security operations center that never sleeps.

- 24/7 monitoring, threat detection, and response
- Every alert reviewed by an analyst who knows your setup
- SIEM and endpoint coverage on a hardened core
- A call from someone who already knows what it means

03

Respond & Harden

CONTAIN AND IMPROVE

Managed security that closes the gap for good.

- Incident response when something real surfaces
- Managed security built on a hardened core
- AI guardrails: data isolation, access controls, and policy
- Part of Adaptive IP Services: IT and signage too

Full-spectrum

Assessment to monitoring to incident response

Human-led SOC

Analysts who understand your environment

Plain English

Reporting you can act on, not a wall of jargon

DFW-based

Local Dallas-Fort Worth team, on the ground

Find out what is exposed before someone else does. The first look is **free**.
